

## NOTICE OF UPCOMING GROUND AND AERIAL HERBICIDE APPLICATION

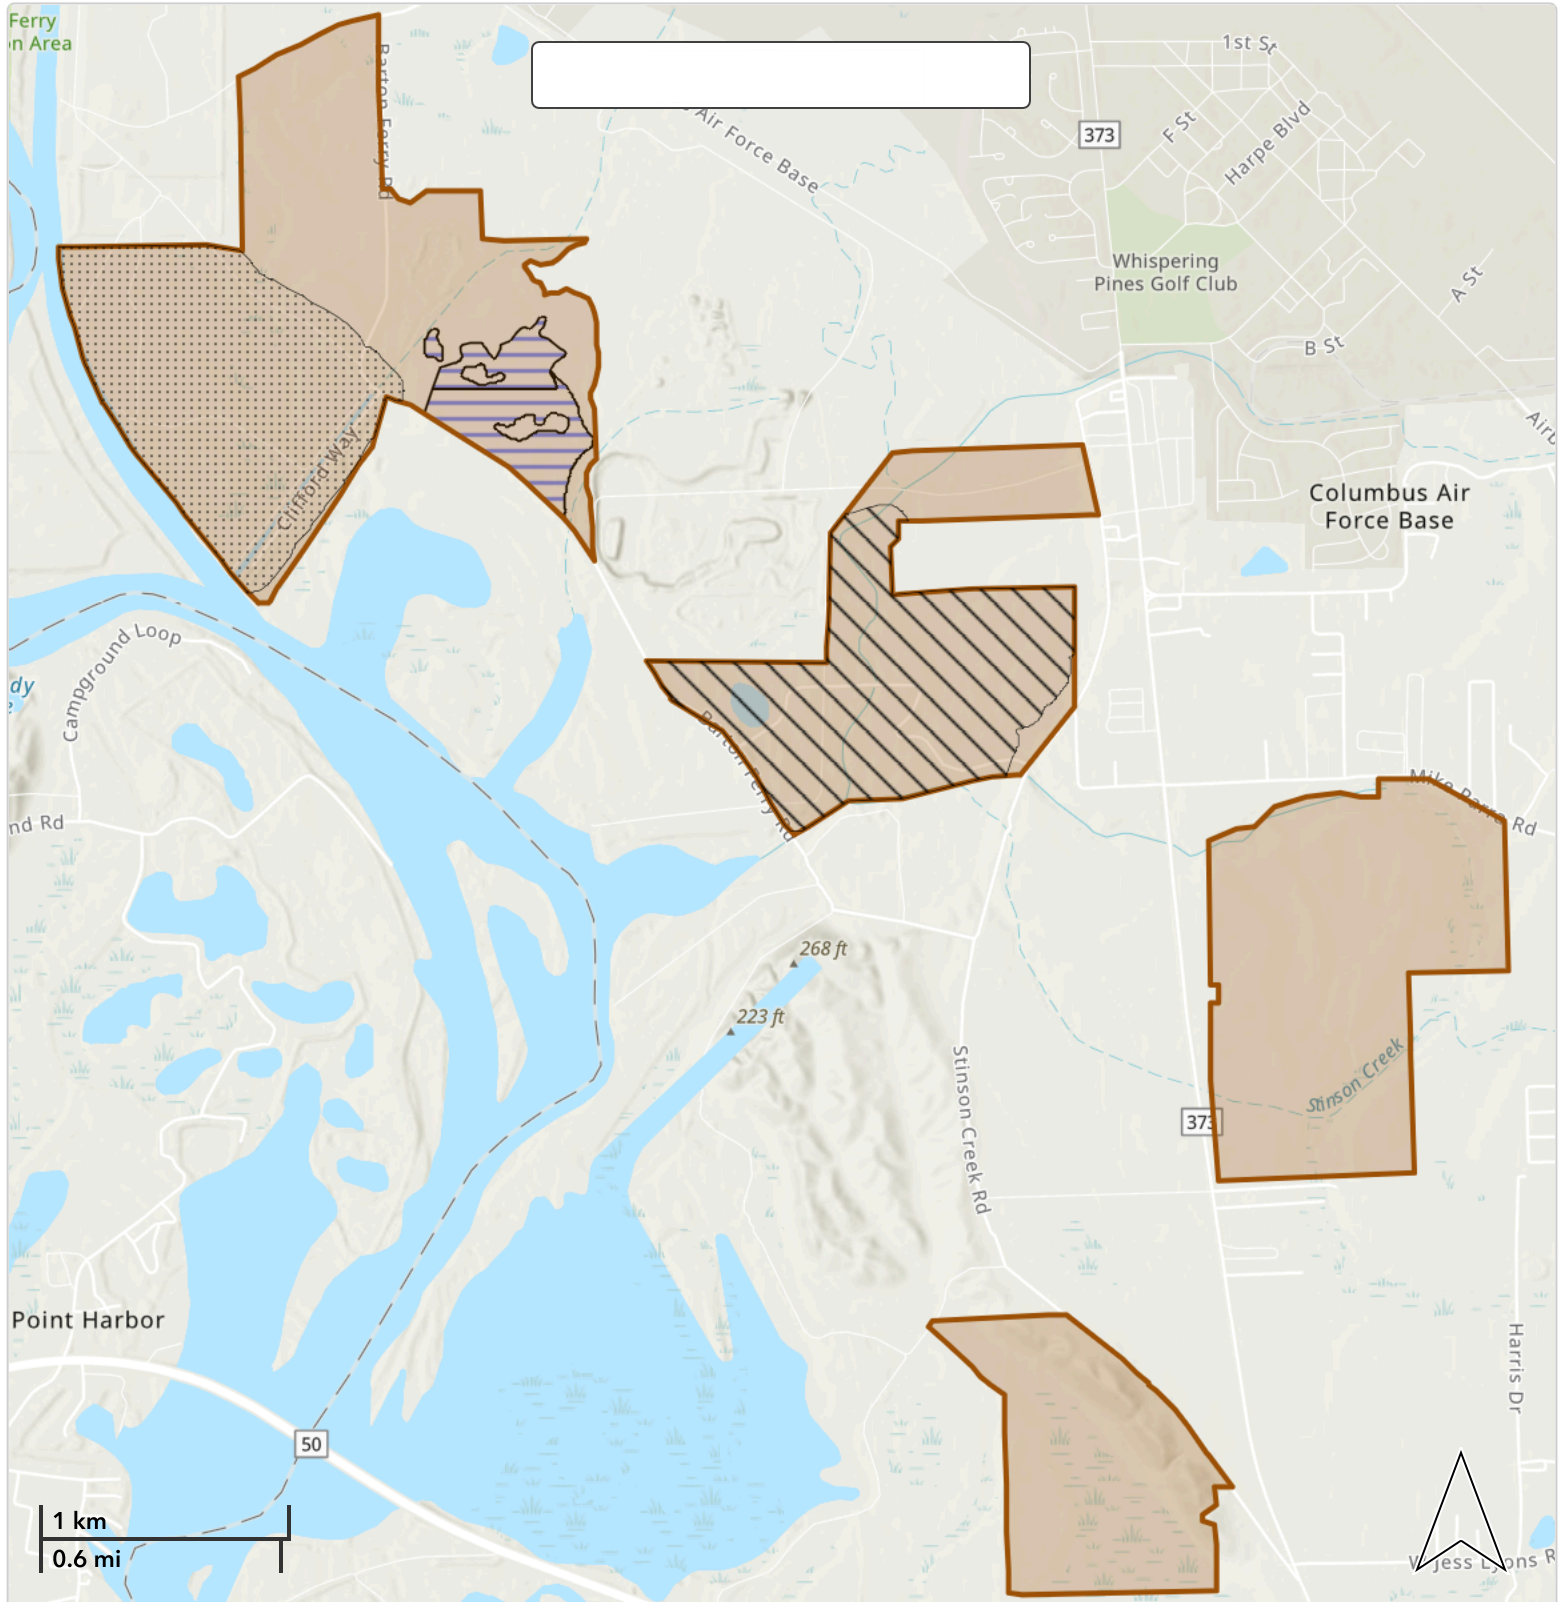

At Weyerhaeuser, we take great pride in being good stewards of our natural resources. Safety is also a core value of our company. We endeavor to keep all people who visit our land protected during active forestry operations. Please read this entire notice and immediately share it with every member & guest of your hunting club to help us achieve this essential safety goal.

**Within the next 6-8 weeks, crews will apply herbicides to select portions of your lease using aerial spray and ground spray equipment. Please note:**

1. A detailed map of the treatment area is shown below.
2. We cannot provide an exact day or time when the treatment will occur as timing of the application depends on weather conditions and other operational constraints.
3. On the day of treatment, signs will be posted along roadways at major access points. These signs will provide the actual date and time of the treatment to inform access timing and reentry interval.
4. During the treatment operation and for 48 hours after, no lessees, club members or guests may be present within 100 meters of the treatment area. Refer to the date and time on the signs located at the access points to ensure everyone adheres to the 48-hour "no entry" requirement.
5. If for any reason, club members or guests are located within 100 meters of the treatment area when the operation begins, immediately leave the treatment area, and do not return for 48 hours.

This treatment will temporarily control vegetation that competes with young trees for nutrients, sunlight, and water. Outside of food plots which have been enrolled in the Food Plot Rental Program, we advise not planting any wildlife food plots within the treatment area before fall 2026.

\* Small overlaps of harvest and treatment types from adjacent lease boundaries may cause the legend item to appear when those areas are not visible on the map

### Treatment Type

\* Displayed notification area includes a 300 foot buffer on planned treatment

 Herbicide (Aerial)  Herbicide (Ground)
